

ENDURANCE

ALUMINIUM DEEP V HULL

Aristocraft Leisure is proud to release its new line up for 2012-13.

This year we have made significant improvements over previous versions for a similar investment. Working together with the Aristocraft factory we have been able to provide boats with features sometimes found on more expensive brands.

We all know how tough the Australian climate is, so going that extra step is all important. This year for many of our boats we have elected to use VALMAX by Mehler Technologies. VALMAX is a high quality PVC coated special fabric targeted to satisfy extreme physical requirements.

We have also moved on in the bonding department and this year is the inclusion of Heat welded seams on selected models. Hand glued or cold welded seams have a limited application in Australian conditions, so if using a premium material one would ensure using the bonding process that suited the application and Heat welded seams proved the best solution.

Many more upgrades have found their way in our line up so please see specifications for more information.

Fact Box

The VALMEX® boat material is a unique material for use in the manufacture of inflatable boats.

- The fabric is very elastic, however, it is unsusceptible against mechanical damages.
- The coating is absolutely airtight and watertight.
- The material is extremely temperature resistant against temperatures above and below freezing.
- The surface conditioning provides exact, airtight and watertight seams and it is dirt resistant.

SPECS

- VALMAX GERMAN PVC
- HEAT WELDED SEAMS
- FULLY ADJUSTABLE ALLOY SEAT
- DEEP V ALLOY HULL
- FULL LENGTH RUBBING STRAKE WITH SPRAY DEFLECTOR
- RE-ENFORCED TRANSOM
- MULTIPLE TIE OFF POINTS
- OARS
- HEAVY DUTY FOOT PUMP
- REPAIR KIT
